

To Whom It May Concern:

I would like to take this opportunity to address the benefits that I receive from satellite radio. Satellite radio offers unprecedented quality and choice - available no matter where you reside in the US. The traffic and weather channels offer depth, accuracy and frequency that simply is not available on terrestrial radio. I rely on them to assist me with my daily commute.

The overall variety and quality of satellite radio simply doesn't exist with terrestrial broadcasting. I made the choice to pay for these services and should be entitled to receive the service I pay for. It should not be up to the National Association of Broadcasters to dictate what I am permitted to hear.

I respectfully urge you to reject NAB's petition 04-160. I pay for satellite radio service and the NAB should not be deciding what I can and can't listen to.

Respectfully,
Scott D. Madden
Washington, DC
